

Revista Vertentes do Direito is based on interdisciplinarity, and this relationship of connection, intercession between two or more school subjects or fields of knowledge, was the keynote of 2020, because if it is possible to define the present year in a single adjective, we dare to define it as “singular”, since it becomes at least in recent history a single, distinct, odd year. In calling for us to “break down” barriers, to build bridges between the areas of knowledge, with the aim of establishing a fruitful dialogue for the present time and consequently for the near future.

Thus, what is sought to be established is a process of (re) construction of paths, looks, either for oneself, for the other, or for the collective, because what was considered “normal” was overlaid by a scenario beyond what was imagined by any projection designed.

If we are looking at the path, it is impossible not to talk about walking, because the way one walks along a road is capable of altering the perception of the path, and this mutation of perception and understanding requires the building from multiple knowledge, it is not appropriate, a monologue of a single knowledge, it is necessary to converge, it is necessary to expand frontiers, to explore “new territories” of knowledge, so that we can, as one and collective, design and consolidate better internal and external paths.

And in the quest to build better and new paths for interdisciplinary knowledge in the legal field, we are pleased to present volume 7 number 02/2020 of the *Revista Vertentes do Direito*, in its 14th edition of the Federal University of Tocantins Law Course.

This edition includes 20 articles and we inaugurated a new session in our Revista, the Experience Report, a fact that leads us to celebrate !!!!

We emphasize that among the 20 articles published in this edition, 60% are from authors exogenous to the State of Tocantins, we continue so, respecting the exogenous criteria for each edition determined by CAPES Qualis System, from the Ministry of Education, seeking new evaluative levels for *Revista Vertentes do Direito*, with 40% of them having at least one coauthor with a PhD and 50% of them having at least one coauthor with a Master's degree.

Four Brazilian Regions are present in this volume, North (Tocantins), Northeast (Bahia) Midwest (Mato Grosso, Mato Grosso do Sul and Distrito Federal); Southeast (Minas Gerais, São Paulo, Rio de Janeiro and Espírito Santo), totalizing 09 federative units, and the authors of the articles in this issue are linked to 15 universities in 2 different countries (Spain and Brazil).

It is important to highlight that the path taken until now by Revista Vertentes do Direito is successful due to the partnership, commitment and dedication of an expressive group of people who believe in its proposal, and in this context it is essential to thank the reviewers of this Edition, whose analysis of the different works submitted to us allowed the composition of this edition.

Our special thanks to the researchers who send their articles to our *Revista Vertentes do Direito* motivated by the confidence in our work.

Wishing you all a good reading !!!

SUYENE MONTEIRO DA ROCHA

Executive Editor of Revista Vertentes do Direito
